Ms. Carlyn Winter Prisk (3HS11)
U.S. Environmental Protection
Agency – Region III
1650 Arch Street
Philadelphia, PA 19103-2029

Re:

Lower Darby Creek Area Superfund Site

Response to Section 104(e) Letter

Dear Ms. Winter Prisk:

This letter is submitted in response to the information inquiry letter (the "EPA 104(c) Letter") sent to The Union League and seeking information concerning what the Agency has referred to as the Lower Darby Creek Superfund Site (the "Site"), which apparently encompasses three former landfills known as the Folcroft Landfill, Clearview Landfill and Folcroft Annex. Initially, I would like to thank the Agency for affording the Union League additional time within which to respond to the request. The request is very comprehensive, covering a nearly 20-year time period from nearly 30 years ago.

At this time, I am not sure how it is that we did not submit this response sooner. It was directed to the former President and, perhaps, that contributed to the fact that there was inadequate follow-through here. Please accept my apologies for this apparent oversight.

This response is subject to the following general and specific objections.

I. Preliminary Objections.

With no disrespect intended to EPA or its investigatory mission here, we object to the Section 104(e) Letter:

- a. to the extent that it seeks to compel the disclosure or production of information beyond that which EPA is authorized to obtain pursuant to the cited statutory authorities;
- b. to the extent that it seeks to compel the disclosure or production of information or documents subject to a claim of privilege, including, without limitation, a claim of attorney client-privilege, accountant-client privilege or attorney work product --

- c. to the extent that it is vague, ambiguous, or unduly burdensome, and to the extent that it seeks the production of information or documents not relevant to hazardous substance disposal or management at the Site or not reasonably calculated to lead to the discovery of information or documents relevant to hazardous substance disposal or management at the Site;
- d. to the extent that it purports to impose a continuing or endless obligation to investigate the matters under inquiry or supplement this response;
- e. to the extent that it contains loosely-used and undefined references to phrases such as "the Site", "properties," "Philadelphia area," "Landfill", and the like, insofar as those terms are undefined and no map or surveyed drawing is provided to identify and described those areas with certainty; and
- f. to the extent it seeks to (1) impose any affirmative obligation to conduct investigations outside of our current offices or employees, (2) develop or present information in any particular form or format not maintained by us in the ordinary course of business, or (3) compel us to gather or produce information or documents not currently in our care, custody and control;

II. Non-admission/Reservation of Rights.

Nothing in this response is intended, nor shall it be construed as, an admission of liability or fault in connection with any matter, including the presence of hazardous substances on or about the Site, any environmental condition on or about the Site, or any release or threatened release of any hazardous or polluting substance on or about the Site. Moreover, nothing herein is intended, nor shall it be construed, as a release or waiver of any claims or causes of action we now have, or hereafter may have in connection with any matter, including the Site or any person who may have owned or operated the Site, or who may have transported or arranged for the transportation or disposal of any hazardous substance or other pollutant to or at the Site.

Additionally, we note that the information provided herein is being provided under compulsion and, therefore, we expressly reserve our right, to the fullest extent permitted by law, to object to and/or oppose its use or production in any matter or proceeding.

III. General Statement Regarding the Lower Darby Creek Area Site(s).

- The Union League is not now and never has been an owner or operator of the landfills described in the EPA 104(e) Letter.
- The Union League is not now and never has been an owner or operator of the real estate on which the landfills described in the EPA 104(e) Letter are located, or any adjacent real estate.

- The Union League does not know who owned or operated the landfills or the real estate on which they are located.
- The Union League is not now, and never has been a transporter or hauler of hazardous substance-containing wastes to the landfills described in the EPA 104(e) Letter and has never owned or leased any trucks or vehicles for the operation of any type of waste transportation or waste hauling business.
- To the best of its knowledge, based on its investigations conducted to the date of this response, the Union League did not knowingly arrange to have any solid waste it may have generated during the relevant time period sent to any of the landfills described in the EPA 104(e) Letter. If any solid wastes generated by the Union League during the relevant time period were disposed at any of the landfills described in the EPA 104(e) Letter, the decision to dispose of such solid wastes, if any, at the landfills, would have been solely and exclusively made by the contract transporter of such wastes.
- Based on general information and belief, solid wastes generated by the Union League during the relevant time period would have been municipal-like solid wastes.
- The Union League is not now, and was not during the relevant time period, a manufacturer or industrial operation of any kind.

IV. Substantive Responses.

- 1. The Union League of Philadelphia, 140 S. Broad Street, Philadelphia, PA 19102. Telephone: 215-587-5575. Website address: www.unionleague.org
 - a. March, 1864 Pennsylvania
 - b. March, 1864 Pennsylvania
 - c. Not applicable

See the accompanying literature on the Union League and visit our website at www.unionleague.org.

- 2. The Union League is a private, not-for-profit, members-only club and has been since its formation in 1864. During the relevant time period through today, the Union League has operated a restaurant, bar and meeting facilities for its members. Approximately, five years ago, the Union League established the Inn at the League, providing overnight accommodations for a limited number of members or their guests. For additional information, see the literature referenced in response 1, or visit our website.
- 3. As of the date of this response, we have identified the following persons as persons who may have (or may have had) knowledge regarding the waste generation and management activities that are the subject of this question:
 - a. Daniel M. Layman, General Manager, 1950-1978

Cornelius McKinley, Asst. Gen. Manager, 1960-1970 b.

Richard Breth, Asst. & Gen. Mgr., 1970-1979

Deceased Retired -

c. No current address, believe he resides in

Charles Thiee, Carpenter, later a maintenance supervisor, 1962-1998. Retired -

James Riley, Carpenter/maintenance e.

d.

Deceased

Howard Welch, Comptroller, c. 1960-1990 f.

Retired to Mexico

Lloyd Robinson, Carpenter/maintenance g.

Deceased

- See the literature referenced in response 1, or visit our website for more information. The 4. members are not owners.
- 5. There is no one currently employed at the Union League who was employed here during the relevant time period and the Union League has not found any records from that time period that bear upon the handling and/or generation, storage, treatment, transportation, recycling, formulation, or disposal of any hazardous substances, hazardous waste, pollutant, contaminant or other waste between 1958 and 1976. We were informed by retired carpenter/maintenance employee Charles Thiee that for some period beginning in the early 1970s and continuing until sometime in the 1980s, the Union League had an incinerator on site and solid wastes generated by daily operations - whatever they may have been -- were incinerated on the premises during evening hours. The incinerator reportedly was removed in the mid-1980s, but we do not have any documentation relating to that event. Throughout the relevant time period and continuing to this day, sanitary wastewaters from sinks, showers, baths, drains and toilets have been discharged to the City of Philadelphia's sanitary sewer system, although, again, we have no documents relating to these discharges during the relevant time period.
- 6. See the response to question 5 above. No one currently employed at the Union League was employed here during the relevant time period and we have not found any documents from that time period bearing on the chemical composition, hazardous substance constituency, or volume of any wastes that would have been generated during the relevant time period. Former carpenter/maintenance employee Charles Thiee recalls that during an unspecified portion of the relevant time period, the Union League had up to 7 two yard roll-off containers located along the Moravian Street side of the Union League building, and into which some solid waste generated from daily activities would have been placed for pickup by an outside waste hauler, whose identity Mr. Thiees does not now recall. Within the Union League, Mr. Thiees recalls that the maintenance staff had a plumbing shop, mechanical shop, electrical shop, carpentry shop and paint shop, each a small room with one or two 30-40 gallon trashcans. Whatever wastes were generated on a daily basis in association with activities in these shops would have been placed in these trashcans. When the trashcans were full, they would have been taken up to the two-yard roll-offs located along Moravian Street. Mr. Thiees recalls only generally that there was "nothing hazardous" in the wastes generated in these shops.
- See the response to question 5 above. No one currently employed at the Union League was employed here during the relevant time period and we have not found any documents from that time period bearing on any by-products or wastes generated, stored, transported, treated, disposed of, released, or otherwise handled by the Union League. Today, approximately 75

percent of the weight-volume of solid waste generated by the Union League's daily activities is restaurant/food service related and it is segregated from general refuse for pick up by a New Jersey hog farmer named Schisler. Schisler picks up the food waste and hauls it (we understand) to his hog farm. Mr. Thiees recalls that the same practice was employed during some portion of his employment at the Union League during the relevant time period, although Mr. Thiees did not recall the identity of the hog farmer(s) that picked up or received these food wastes during the relevant time period. Also having some bearing on this series of questions is the fact that the Union League operated its own on-premises incinerator for the disposal of general refuse, and sanitary wastewaters were discharged to the City sanitary sewer system on a daily basis throughout the relevant time period. We do not know the frequency of incinerator operation, although it reportedly was operated during evening hours.

- 8. See the response to question 5 above. No one currently employed at the Union League was employed here during the relevant time period and we have not found any documents from that time period confirming contractual relations with any of the landfills or persons identified in question 8. Billing information and records related to any waste management transactions during the relevant time period were destroyed/disposed decades ago. Today, such records are generally not kept more than 1 year on the premises. These records are then sent to off-site storage for up to two years more before they too are disposed by the remote document storage facility. Former employee Mr. Thiees, who was consulted in the preparation of this response, did not believe any of the companies or individuals identified in question 8 hauled wastes for or from the Union League during the period of his employment within the relevant time period.
- 9. See the General Statement in Section III above, as well as the response to question 5 above. The Union League never owned or operated the three landfills and, beyond what it learned from reading EPA's 104(e) Letter, does not know who used them, who transported waste to them or who arranged to dispose of wastes within them, as variously posed in question 9.
- 10. See the above responses. The Union League has no information indicating that any solid wastes generated at its facility during the relevant time period was ever disposed at any of the landfills described in the EPA 104(e) Letter.
- 11. See the above responses. Beyond what it learned from reading EPA's 104(e) Letter, the Union League does not know of any spills or releases at the landfills and it did not cause any that may have occurred.
- 12. See the responses to questions 5 and 3 above. No one currently employed at the Union League was employed here during the relevant time period and we have not found any documents from that time period identifying who among the Union League employees was responsible for arranging for the removal or disposal of wastes. It is possible that it was one or more of the persons identified in response to question 3 above. Today it is the facility engineer, Gary Tavani, who started at the Union League in 1988. Payment matters would have been handled by the Comptroller position, but no records from the relevant time period relating to any such transactions exist today at the Union League or in any off-site storage facility with whom it currently maintains an arrangement for the short-term (2 year) storage of accounting records.

- 13. No.
- 14. We have no such information.
- 15. a. Jeffrey P. Mc Fadden
 General Manager
 140 S. Broad Street
 Philadelphia, PA 19102
 215-587-5574

Gary Tavani, Facility Engineer 140 S. Broad Street Philadelphia, PA 19102 215-587-5599

Sheryl Stern Controller 140 S. Broad Street Philadelphia, PA 19102 215-587-6448

- b. Jeffrey P. Mc Fadden General Manager 140 S. Broad Street Philadelphia, PA 19102 215-587-5575.
- 16 No one currently employed at the Union League was employed here during the relevant time period and we have not found any documents from that time period that are responsive to the questions posed in the EPA 104(e) Letter. The Union League does not have a written document retention policy relating to documents of the type solicited in the EPA 104(e) Letter. It is our belief, based on current document management practices. that documents of the type solicited in this response, to the extent they ever existed, were either disposed in the ordinary course, or otherwise destroyed. Again, because no one currently employed here was employed here during the relevant time period, we do not know when, where or specifically why the documents were destroyed. As noted in response to question 12 above, accounting records, which could have included contracts, bills, cancelled checks, correspondence and payment records related to waste haulers, are not likely to have been kept more than 3 years from their date of generation, simply due to storage constraints at our existing facility. Today, such documents are maintained on the premises for up to one year, then sent off-site to a document storage contractor, where they are stored for up to another two years. After two years, the documents are disposed or destroyed by the off-site document storage contractor. This has been the practice at the Union League for as long as the current employees can remember. We do not know whether during the relevant time period off-site document storage contractors would have

been used, but the documents are not in existence today at the Union League and we are not aware of any off-site facility where they might have been maintained.

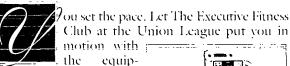

* * *

If EPA has documents or other information suggesting that solid wastes generated by the Union League during the relevant time period were transported to one or more of the landfills, we would be happy to review it and supplement this response. If EPA has any documents or information suggesting that any waste generated by the Union League during the relevant time period contained hazardous substances, we would like to review it. Please let me know if that is the case.

Sincerely,

Jeffrey P. McFadden General Manager

THE UNION LEAGUE OF PHILADELPHIA
140 South Broad Street
Philadelphia, PA 19102
www.unionleague.org

THE UNION LEAGUE

OF PHILADELPHIA

The Union League, which occupies an entire city block in the center of Philadelphia's commercial and cultural district, is a shining jewel of history in a city defined by such treasure. Founded in 1862 as a patriotic society to support the policies of President Abraham Lincoln, The Union League has hosted U.S. presidents, heads of state, industrialists, entertainers and visiting dignitaries from around the globe. It has also given loyal support to the American military in each conflict since the Civil War, and continues to be driven by its founding motto, "Love of Country Leads." Early efforts and influence of the Union League of Philadelphia laid the philosophical foundations of other Union Leagues across the nation.

The classic French Renaissance-styled League House, with its brick and brownstone façade and dramatic twir circular staircases leading to the main entrance, is listed in the National Historic Register, and dates back to 1865, when the Broad Street building was completed. With approximately one-quarter million square feet of space, the building is spread out over eight floors and has entrances on all sides: north, south, east, and west. Inside, the traditional décor is accented in rich leather, patinated wood and polished marble. Adorning the walls and hallways is the League's distinguished art collection, artifacts imbued with the heritage and culture
